Re: Revised Phosphorus-Based Nutrient Management Plan (NMP)

Dear Mr. Reuvekamp:

The Department of Environment and Natural Resources (DENR) received your request to revise and re-approve the fields listed in the following table. These fields were previously in your approved phosphorus-based nutrient management plan (NMP) but when the manure application agreement with the landowner of these fields expired, the fields were no longer approved. An updated manure application agreement with the landowner has now been submitted. Your existing phosphorus-based NMP is part of your application for coverage under the *2003 General Water Pollution Control Permit for Concentrated Animal Feeding Operations* (general permit). Your animal feeding operation was originally approved on June 2, 1998, and permitted on October 16, 1998, (general permit # SDG-0100007). The permit was transferred to you on March 31, 2006.

NMP Fields Being Revised and Re-Approved						
Line #	Field or Tract #	County	Legal Description	Available Acres	Soil Sampling Requirements	
					0-2 feet	Additional
64	1043 F1,2	Brookings	W 1/2 of NW 1/4, Section 25, T110N, R48W	64.8	Yes	No
68	1043 F3-6	Brookings	NE 1/4, Section 25, T110N, R48W	129.2	Yes	No

The revisions to these fields consist of combining the fields previously identified as *Fields 1043 F1 (line #64) and 1043 F2 (line #65)* into *Field 1043 F1,2 (line # 64)* and the fields previously identified as *Fields 1043 F3,6 (line #68), Fields 1043 F4,6 (line #69), and 1043 F5,6 (line #70)* into *Field 1043 F3-6 (line #68)*.

We are approving the modifications and are including *Field 1043 F1,2 (line # 64)* and *Field 1043 F3-6 (line #68)* in your approved phosphorus-based NMP. **Please put one copy of the approved field information in Appendix D of your copy of the permit.** You are required to comply with the terms and conditions of your permit.

We have received your permit application for state permit coverage under the *2017 General Water Pollution Control Permit for Concentrated Animal Feeding Operations* (2017 general permit). Your application is currently under review. Until permit coverage is issued under the 2017 general permit, you may continue to use your currently approved NMP for the land application of manure and wastewater from your operation in compliance with your coverage under the 2003 general permit.
